# AUTHOR INDEX

Abraham, E.C., see Kasten-Jolly, J. (913) 89
Ackermann, I., see Littlechild, J. (913) 245
Agneray, J., see Biou, D. (913) 308
Anderson, H.C., see Hsu, H.H.T. (913) 329
Antranikian, G., see Quentmeier, A. (913) 60
Arcadi, A., see Miranda, M. (913) 386
Atkinson, T., see Clarke, A.R. (913) 72
Atkinson, T., see Waldman, A.D.B. (913) 66

Balasubramanian, K.A., see Baskaran, S. (913) 377
Banerjee, A., Barnes, L.D. and Luduena, R.F.
The role of the B-ring of colchicine in the stability of the colchicine-tubulin complex (913) 138
Baptist, V., see Vanderwinkel, E. (913) 238
Barnes, L.D., see Banerjee, A. (913) 138
Barstow, D., see Waldman, A.D.B. (913) 66
Barstow, D.A., see Clarke, A.R. (913) 72
Baskaran, S. and Balasubramanian, K.A.
Purification and active site modification studies on glyoxalase I from monkey intestinal mucosa (913) 377
Beckmann, J., see Tschesche, H. (913) 97
Bélaïche, D., Loir, M., Kruggle, W. and Sautière, P.
Isolation and characterization of two protamines St1 and St2 from stallion spermatozoa, and amino-acid sequence of the major protamine St1 (913) 145
Biou, D., Konan, D., Féger, J., Agneray, J., Leroy, Y., Cardon, P., Fournet, B. and Durand, G.
Alterations in the carbohydrate moiety of alpha-1-acid glycoprotein purified from human cirrhotic ascitic fluid (913) 308
Bismuto, E., Irace, G., Colonna, G., Jameson, D.M. and Gratton, E.
Dynamic aspects of the heme-binding site in phylogenetically distant myoglobins (913) 150
Blair, J.B., see Rafter, G.W. (913) 195
Bonfigli, A., see Miranda, M. (913) 386
Bonicel, J., see Bovier-Lapierre, G. (913) 20
Borovikov, Y.S., see Kąkol, I. (913) 1
Bovier-Lapierre, G., Bruschi, M., Bonicel, J. and Hatchikian, E.C.
Amino-acid sequence of *Desulfovibrio africanus* ferredoxin III: a unique structural feature for accommodating iron-sulfur clusters (913) 20
Bretting, H. and Jacobs, G.
The reactivity of galactose oxidase with snail galactans, galactosides and D-galactose-composed oligosaccharides (913) 342
Britton, G., see Merlin, J.-C. (913) 111
Bruschi, M., see Bovier-Lapierre, G. (913) 20

Burgess-Cassler, A., Hinrichsen, R.D., Maley, M.E. and Kung, C.
Biochemical characterization of a genetically altered calmodulin in *Paramecium* (913) 321

Cardon, P., see Biou, D. (913) 308
Castro, B., see Cumin, F. (913) 10
Chalabi, P., Maniscalco, S., Cohn, L.E. and Fisher, H.F.
The effects of an acetate-sensitive anion binding site on NADPH binding in glutamate dehydrogenase (913) 103
Chappell, C.L., Dresden, M.H. and Walters, D.W.
Glutathione activation of a cysteine proteinase from *Schistosoma mansoni* (913) 335
Charles, P., see Vanderwinkel, E. (913) 238
Chia, W.N., see Clarke, A.R. (913) 72
Chia, W.N., see Waldman, A.D.B. (913) 66
Clarke, A.R., Wigley, D.B., Barstow, D.A., Chia, W.N., Atkinson, T. and Holbrook, J.J.
A single amino acid substitution deregulates a bacterial lactate dehydrogenase and stabilizes its tetrameric structure (913) 72
Clarke, A.R., see Waldman, A.D.B. (913) 66
Cohn, L.E., see Chalabi, P. (913) 103
Cokic, P. and Erman, J.E.
The effect of complex formation upon the reduction rates of cytochrome *c* and cytochrome *c* peroxidase compound II (913) 257
Collier, H.B., see Stinson, R.A. (913) 272
Collins, M.F., see Hirrell, P.A. (913) 92
Colonna, G., see Bismuto, E. (913) 150
Corvol, P., see Cumin, F. (913) 10
Cumin, F., Le-Nguyen, D., Castro, B., Menard, J. and Corvol, P.
Comparative enzymatic studies of human renin acting on pure natural or synthetic substrates (913) 10

Deimling, O., see Mentlein, R. (913) 27
De Kock, R., see Siepker, L.J. (913) 349
Del Boccio, G., see Miranda, M. (913) 386
De Vlieghere, M., see Vanderwinkel, E. (913) 238
Diehl, H., see Schröder, U. (913) 185
Di Ilio, C., see Miranda, M. (913) 386
Dijk, J., see Littlechild, J. (913) 245
Dirr, H.W. and Schabort, J.C.
Characterization of the aflatoxin $B_1$-binding site of rat albumin (913) 300
Dresden, M.H., see Chappell, C.L. (913) 335
Dunn, B.M., Valler, M.J., Rolph, C.E., Foundling, S.I., Jimenez, M. and Kay, J.

The pH dependence of the hydrolysis of chromogenic substrates of the type, Lys-Pro-Xaa-Yaa-Phe-($NO_2$)Phe-Arg-Leu, by selected aspartic proteinases: evidence for specific interactions in subsites $S_3$ and $S_2$ (913) 122
Dupre', S., see Miranda, M. (913) 386
Durand, G., see Biou, D. (913) 308

Eftink, M.R., see Wasylewski, Z. (913) 210
Erman, J.E., see Cokic, P. (913) 257
Evstigneeva, Z.G., see Tsuprun, V.L. (913) 368

Federici, G., see Miranda, M. (913) 386
Féger, J., see Biou, D. (913) 308
Feiters, M.C., see Petersson, L. (913) 228
Finn, A., see Jones, M.N. (913) 395
Fisher, H.F., see Chalabi, P. (913) 103
Ford, M., see Siepker, L.J. (913) 349
Foundling, S.I., see Dunn, B.M. (913) 122
Fournet, B., see Biou, D. (913) 308

Golly, I. and Hlavica, P.
Regulative mechanisms in NADH- and NADPH-supported *N*-oxidation of 4-chloroaniline catalyzed by cytochrome $b_5$-enriched rabbit liver microsomal fractions (913) 219
Gratton, E., see Bismuto, E. (913) 150
Guest, J.R., see Miles, J.S. (913) 117

Hamilton, J., see Hsu, H.H.T. (913) 329
Hamodrakas, S.J., Kamitsos, E.I. and Papadopoulou, P.G.
Laser-Raman and infrared spectroscopic studies of protein conformation in the eggshell of the fish *Salmo gairdneri* (913) 163
Harding, D.R.K., see Keogh, S.J. (913) 39
Hardman, M.J., see Keogh, S.J. (913) 39
Hart, K.W., see Waldman, A.D.B. (913) 66
Hatchikian, E.C., see Bovier-Lapierre, G. (913) 20
Hennessey, Jr., J.P. and Siebenaller, J.F.
Inactivation of NAD-dependent dehydrogenases from shallow- and deep-living fishes by hydrostatic pressure and proteolysis (913) 285
Heymann, E., see Mentlein, R. (913) 27
Hinrichsen, R.D., see Burgess-Cassler, A. (913) 321
Hirrell, P.A., Collins, M.F., Nimmo, I.A. and Strange, R.C.
The human glutathione *S*-transferases. Studies on the kinetic, stability and inhibition characteristics of the erythrocyte enzyme (913) 92
Hlavica, P., see Golly, I. (913) 219
Holbrook, J.J., see Clarke, A.R. (913) 72
Holbrook, J.J., see Waldman, A.D.B. (913) 66
Holzenburg, A., see Quentmeier, A. (913) 60
Hsu, H.H.T., Rouse, J., Hamilton, J. and Anderson, H.C.
Purification and partial amino acid sequencing of rat bone tumor (UMR106) alkaline phosphatase (913) 329
Hurle, M.R. and Matthews, C.R.
Proline isomerization and the slow folding reactions of the α subunit of tryptophan synthase from *Escherichia coli* (913) 179

Irace, G., see Bismuto, E. (913) 150

Jacobs, G., see Bretting, H. (913) 342
Jameson, D.M., see Bismuto, E. (913) 150
Jimenez, M., see Dunn, B.M. (913) 122
Jones, M.N., Finn, A., Mosavi-Movahedi, A. and Waller, B.J.
The activation of *Aspergillus niger* catalase by sodium *n*-dodecyl-sulphate (913) 395

Kąkol, I., Borovikov, Y.S., Szczęsna, D., Kirillina, V.P. and Levitsky, D.I.
Conformational changes of F-actin in myosin-free ghost single fibre induced by either phosphorylated or dephosphorylated heavy meromyosin (913) 1
Kamitsos, E.I., see Hamodrakas, S.J. (913) 163
Kanaoka, Y., see Tanizawa, K. (913) 292
Kanzaki, H., Nagasawa, T. and Yamada, H.
Insight into the active site of *Streptomyces* cystathionine γ-lyase based on the results of studies on its substrate specificity (913) 45
Kasten-Jolly, J. and Abraham, E.C.
Influence of γ-chain amino-terminal acetylation on subunit assembly of human fetal hemoglobin (913) 89
Kay, J., see Dunn, B.M. (913) 122
Keogh, S.J., Harding, D.R.K. and Hardman, M.J.
The complement component $C\bar{1}s$ catalysed hydrolysis of peptide 4-nitroanilide substrates (913) 39
Kirillina, V.P., see Kąkol, I. (913) 1
Kiselev, N.A., see Tsuprun, V.L. (913) 368
Konan, D., see Biou, D. (913) 308
Kramer, S., see Siepker, L.J. (913) 349
Kretovich, W.L., see Tsuprun, V.L. (913) 368
Kruggle, W., see Bélaïche, D. (913) 145
Kung, C., see Burgess-Cassler, A. (913) 321

Le-Nguyen, D., see Cumin, F. (913) 10
Lee, C.S., see Tavares, A. (913) 279
Leroy, Y., see Biou, D. (913) 308
Levitsky, D.I., see Kąkol, I. (913) 1
Lingwood, C., see Taylor, T. (913) 131
Little, M., see Singhofer-Wowra, M. (913) 51
Littlechild, J., Malcolm, A., Paterakis, K., Ackermann, I. and Dijk, J.
The tertiary structure of salt-extracted ribosomal proteins from *Escherichia coli* as studied by proton magnetic resonance spectroscopy and limited proteolysis experiments (913) 245
Loir, M., see Bélaïche, D. (913) 145
Luduena, R.F., see Banerjee, A. (913) 138

McFarlane, E.F., see Shin, H.-C. (913) 155
McPhee, J.L., see Stinson, R.A. (913) 272
Malcolm, A., see Littlechild, J. (913) 245
Maley, M.E., see Burgess-Cassler, A. (913) 321
Maniscalco, S., see Chalabi, P. (913) 103
Marchis-Mouren, G., see Seigner, C. (913) 200
Matsukawa, S., see Mawatari, K. (913) 313
Matthews, C.R., see Hurle, M.R. (913) 179
Mawatari, K., Matsukawa, S., Yoneyama, Y. and Takeda, Y.
Assessment of the $\alpha_1\beta_2$ contact structure of valency hybrid hemoglobins by ultraviolet difference spectra (913) 313

Mayer, F., see Quentmeier, A. (913) 60
Mehlich, A., see Tschesche, H. (913) 97
Menard, J., see Cumin, F. (913) 10
Mentlein, R., Ronai, A., Robbi, M., Heymann, E. and Deimling, O.
Genetic identification of rat liver carboxylesterases isolated in different laboratories (913) 27
Merlin, J.-C., Thomas, E.W., Shone, C.C. and Britton, G.
Resonance Raman study of reconstituted carotenoproteins incorporating astaxanthin and 15,15′-didehydroastaxanthin (913) 111
Miles, J.S., Guest, J.R., Radford, S.E. and Perham, R.N.
A mutant pyruvate dehydrogenase complex of *Escherichia coli* deleted in the (alanine + proline)-rich region of the acetyltransferase component (913) 117
Miranda, M., Di Ilio, C., Bonfigli, A., Arcadi, A., Pitari, G., Dupre', S., Federici, G. and Del Boccio, G.
A study on the in vitro interaction between tyrosinase and glutathione *S*-transferase (913) 386
Mosavi-Movahedi, A., see Jones, M.N. (913) 395
Munro, I., see Waldman, A.D.B. (913) 66

Nagasawa, T., see Kanzaki, H. (913) 45
Nakano, M., see Tanizawa, K. (913) 292
Nimmo, I.A., see Hirrell, P.A. (913) 92

Oda, K., see Taylor, T. (913) 131
Orlova, E.V., see Tsuprun, V.L. (913) 368
O'Sullivan, W.J., see Tavares, A. (913) 279

Papadopoulou, P.G., see Hamodrakas, S.J. (913) 163
Paterakis, K., see Littlechild, J. (913) 245
Perham, R.N., see Miles, J.S. (913) 117
Petersson, L., Slappendel, S., Feiters, M.C. and Vliegenthart, J.F.G.
Magnetic susceptibility studies on yellow and anaerobically substrate-treated yellow soybean lipoxygenase-1 (913) 228
Pitari, G., see Miranda, M. (913) 386
Prodanov, E., see Seigner, C. (913) 200
Pushkin, A.V., see Tsuprun, V.L. (913) 368

Qasim, M.A., see Tayyab, S. (913) 359
Quentmeier, A., Holzenburg, A., Mayer, F. and Antranikian, G.
Reevaluation of citrate lyase from *Escherichia coli* (913) 60

Radford, S.E., see Miles, J.S. (913) 117
Rafter, G.W. and Blair, J.B.
Reaction of liver pyruvate kinase with sulfhydryl reagents: effect on its activity (913) 195
Robbi, M., see Mentlein, R. (913) 27
Rolph, C.E., see Dunn, B.M. (913) 122
Ronai, A., see Mentlein, R. (913) 27
Rouse, J., see Hsu, H.H.T. (913) 329

Sautière, P., see Bélaïche, D. (913) 145
Schabort, J.C., see Dirr, H.W. (913) 300
Schindler, F. and Winter, J.
Purification and properties of a soluble, thermophilic hydrogenase of *Acetomicrobium flavidum* (913) 81
Schnabel, E., see Tschesche, H. (913) 97
Schröder, U. and Diehl, H.
Substrate specificity of the carbon monoxide-dependent cytochrome *P*-450 kinetics (913) 185
Seigner, C., Prodanov, E. and Marchis-Mouren, G.
The determination of subsite binding energies of porcine pancreatic α-amylase by comparing hydrolytic activity towards substrates (913) 200
Shiffelova, G.E., see Tsuprun, V.L. (913) 368
Shin, H.-C. and McFarlane, E.F.
The secondary structure of myelin $P_2$ protein derived by secondary structure prediction methods, circular dichroism, and 400-MHz $^1$H-NMR spectroscopy: implications for tertiary structure (913) 155
Shone, C.C., see Merlin, J.-C. (913) 111
Siebenaller, J.F., see Hennessey, Jr., J.P. (913) 285
Siepker, L.J., Ford, M., De Kock, R. and Kramer, S.
Purification of bovine protoporphyrinogen oxidase: immunological cross-reactivity and structural relationship to ferrochelatase (913) 349
Singhofer-Wowra, M. and Little, M.
Isolation and sequencing of α-tubulin peptides from myxamoebae of the slime mould *Physarum polycephalum* (913) 51
Slappendel, S., see Petersson, L. (913) 228
Solovieva, N.A., see Tsuprun, V.L. (913) 368
Stinson, R.A., McPhee, J.L. and Collier, H.B.
Phosphotransferase activity of human alkaline phosphatases and the role of enzyme $Zn^{2+}$ (913) 272
Strange, R.C., see Hirrell, P.A. (913) 92
Sucharski, P., see Wasylewski, Z. (913) 210
Sue, J.M., see Wojchowski, D.M. (913) 170
Sytkowski, A.J., see Wojchowski, D.M. (913) 170
Szczęsna, D., see Kąkol, I. (913) 1

Takeda, Y., see Mawatari, K. (913) 313
Tanizawa, K., Nakano, M. and Kanaoka, Y.
Comparison of *Streptomyces griseus* and bovine trypsin by active site analysis using fluorescent acyl groups (913) 292
Tavares, A., Lee, C.S. and O'Sullivan, W.J.
$^{31}$P-NMR study of the orotate phosphoribosyltransferase equilibrium with thiopyrophosphate as substrate (913) 279
Taylor, T., Oda, K. and Lingwood, C.
Modulation of testicular galactolipid sulfotransferase activity in vitro by ATP (913) 131
Tayyab, S. and Qasim, M.A.
Influence of succinylation of bovine serum albumin on its conformation and bilirubin binding (913) 359
Thomas, E.W., see Merlin, J.-C. (913) 111
Truscheit, E., see Tschesche, H. (913) 97
Tschesche, H., Beckmann, J., Mehlich, A., Schnabel, E., Truscheit, E. and Wenzel, H.R.
Semisynthetic engineering of proteinase inhibitor homologues (913) 97
Tsuprun, V.L., Zograf, O.N., Orlova, E.V., Kiselev, N.A., Pushkin, A.V., Shiffelova, G.E., Solovieva, N.A., Evstigneeva, Z.G. and Kretovich, W.L.

Electron microscopy of multiple forms of glutamine synthetase from bacteroids and the cytosol of yellow lupon root nodules (913) 368

Valler, M.J., see Dunn, B.M. (913) 122
Vanderwinkel, E., De Vlieghere, M., Charles, P. and Baptist, V. Nature of the interactions involved in the lipid-protein complexes of the *Escherichia coli* *N*-acetylmuramoyl-L-alanine amidase (913) 238
Vliegenthart, J.F.G., see Petersson, L. (913) 228
